	A		In	Which	For	Deals with issues	Type
1	New	Algorithm	Household	Is robust	Special	Redundancies	Empirical/Heuristic Online/Offline etc.
2	Novel	Framework	Industry	Is faster	Redundant	Complexities	
3	Modified	Method	Hospital	Has more scope	Extreme	Occlusions	
4	Extended	Case Study	Lab	Is more efficient	Intrinsic	Singularities	
5	Improved	Experiment	etc.	Is less complex	Extrinsic	Null space	
6	Revised	Literature Review		Is less prone to failure	Reduced	etc.	
7	Updated	Survey paper		Has less assumptions	etc.		
8	Comparison	Approach		Is applicable to more scenarios			
9	Representation	Design		Is safer			
10	Classification	Technique		Is lighter			
11	Simplified	Formula		Requires less sensors			
12	Extensive	Calculation		Uses cheap sensors			
13	Limited	Results		Less computationally expensive			
14	Computational	Classification		etc.			
15	Optimized	Taxonomy					
16	Efficient	Apparatus					
17	Thoughts on	Database					
18	Cheap	Compilation					
19	etc.	Proof-of-concept					
20		Dataset					
21		Metrics					
22		Performance measures					
23		etc.
